HideAndSec

We are a group of cybersecurity enthusiasts interested in various areas including software security, binary analysis, web security, cryptography, IoT security, and etc. Besides our own research, all of us enjoy playing CTF and are active members of the HackTheBox Community. Because we believe it is an excellent chance to hone our skills in practice, catch up with the latest trend, and most importantly - compete and have fun!

HideAndSec is CTF team from France founded in 2019. We actively participate in online and onsite CTF competitions. You can browse our recently participated events and rankings. We also perpetually publish CTF and HackTheBox [writeups](#).

Our HackTheBox Team Profile : <https://www.hackthebox.eu/teams/profile/2076>

Members

mxrch

Passionate about computing and security since always, I'm also interested in AI, blockchain and distributed web (IPFS, DAT etc..)
